

Mommy-To-Be: CocoPreggers

As if you really needed another excuse to consume copious amounts of chocolate, along comes **CocoPreggers** from CocoXan. The dark chocolate truffles are fortified with Folic Acid and Vegetarian Life's® DHA. Perfect for the pregnant mama-to-be, the chocolates are non-dairy, gluten-free and vegan, in addition to being low-glycemic and low-calorie.

So after all that, you'd think they might be low on taste, too, but they aren't! They are yummy and a half. We'd consider having another baby just so we could eat these daily! (\$39.99/ 30 pieces, cocoxan.com)
